

# GUIDE TO STANDARD PAPER SIZES

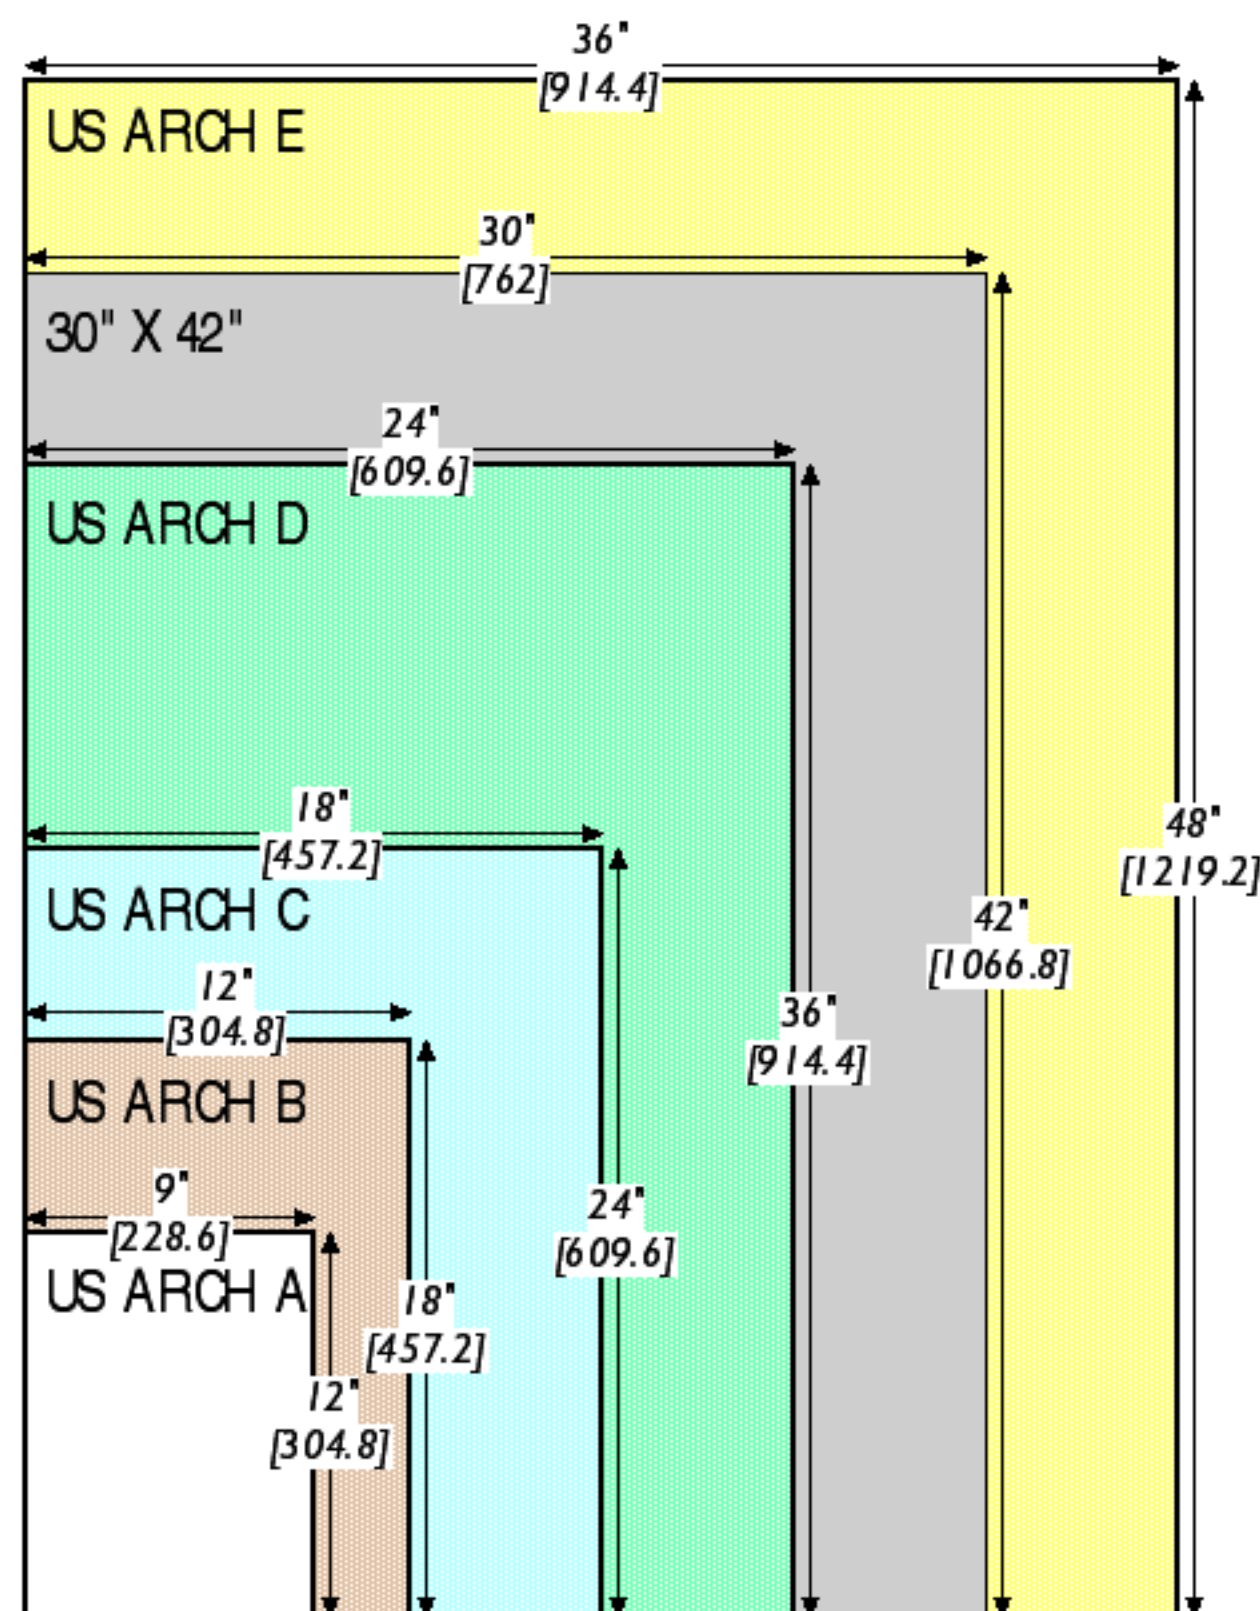

Scale: 1" = 1' - 0"

## US ANSI

ANSI (American National Standards Institute) paper sizes are proportional to the common letter size sheet.

## ARCHITECTURAL

Architectural sheet sizes are based upon a 36" x 48" sheet, and proportionally smaller sizes. In addition to the above, the 24" x 42" sheet size is commonly accepted as a standard size.

## METRIC

The metric "A" series is based upon an A0 sheet being one square metre in area. Although the B1 sheet is in the "B" series, it has come to be commonly accepted.

In order to have less changing of paper rolls in our Océ digital system, we print metric sizes on ANSI paper, e.g. an A0 print would be centered on a 34" high sheet.
