Login to Juniper	2
Connect to ArcGIS Server localhost	2

0.0.1 CONNECTING TO ARCGIS SERVER ADMIN DIRECTORY

GENERATE A PORTAL TOKEN

Run the Python Script

```
import urllib, urllib2, json, ssl

username = "bmayxxx"
password = "gisRxxxxxxxxx"

tokenURL = 'https://gis.allegancounty.org/portal_webadaptor/sharing/#
            rest/generateToken/'
params = {'f': 'pjson', 'username': username, 'password': password, 'referer':#
          'https://portal.allegancounty.org'}
req = urllib2.Request(tokenURL, urllib.urlencode(params))
try:
    response = urllib2.urlopen(req)
except:
    gcontext = ssl.SSLContext(ssl.PROTOCOL_TLSv1)
    response = urllib2.urlopen(req, context=gcontext)
data = json.load(response)
token = data['token']
print(token)
```

Copy the Portal Token

ARCGIS SERVER ADMIN LOGIN

Login to Juniper

Windows R  mstsc  Juniper

Connect to ArcGIS Server localhost

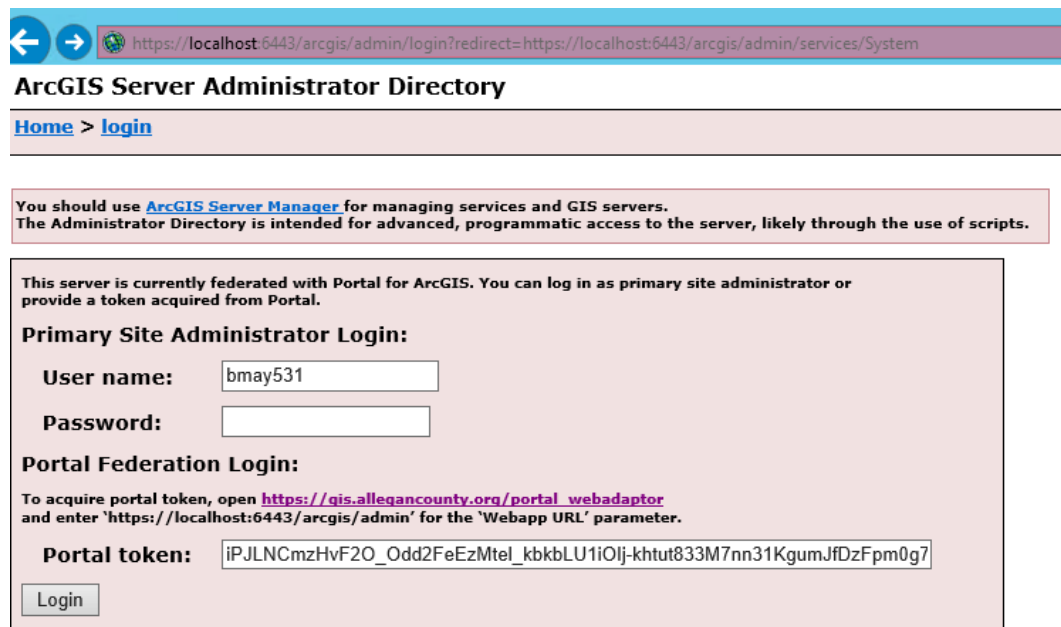

In a browser go to:

`https://localhost:6443/arcgis/admin/services/System`

UN: bmaxxxx

PW: gisRxxxxxxxxx

Paste in the Portal Token

← →  `https://localhost:6443/arcgis/admin/login?redirect=https://localhost:6443/arcgis/admin/services/System`

ArcGIS Server Administrator Directory

[Home](#) > [login](#)

You should use [ArcGIS Server Manager](#) for managing services and GIS servers.
The Administrator Directory is intended for advanced, programmatic access to the server, likely through the use of scripts.

This server is currently federated with Portal for ArcGIS. You can log in as primary site administrator or provide a token acquired from Portal.

Primary Site Administrator Login:

User name:

Password:

Portal Federation Login:

To acquire portal token, open https://gis.allegancounty.org/portal_webadaptor
and enter 'https://localhost:6443/arcgis/admin' for the 'Webapp URL' parameter.

Portal token:

Login

Invalid credentials.
