# Chapter 2

# **Documentation**

# 2.1 About Documentation

#### 2.1.1 How This Book Works

#### **Project General Notes:**

- Book folder can be renamed an moved.
- This project is coded with relative paths from processing folder down.

#### Project file structure:

J:\LIS\GIS\_Doc\book\build

pdf docs created by the underlying .tex docs and copied here manually.

J:\LIS\GIS\_Doc\Book\source

images that appear in

\GIS\_Documentation.tex

J:\LIS\GIS\_Doc\Book\processing

the Tex workspace.

\GIS\_Documentation.tex

top level of documentation of type "book" in LATeX. Where book properties and book parts are managed and chapters are imported.

#### \archive

archive copies of entire processing folder.

## $\brane{Delta}$

 $\LaTeX$  "book part" about the brand.

#### \methodsPart

LATEX "book part" about the methods.

## \servicePart

LATEX "book part" about services.

#### \build

folder for temp docs when created by compiling of:

GIS\_Documentation.tex

\* Note: each level from here down has a build folder for temp Latex files like this.

## Service Book Part Detail

relative path:

 $\verb|\processing\servicePart\toolsChapter.tex| \\$ 

intermediate level of "book" in LATEX. Where (service part, tool) chapter properties are managed and sections are imported.

## ${\bf tools Chapter}$

relative path:

\processing\servicePart\toolsChapter

in termed level of "book" in LaTeX. Where book section properties are managed and subsections are imported.

# 2.2 Document Storage Concepts

# 2.2.1 GIS File Standard

Folders inside the project folder

- $\bullet$  archive
- build
- $\bullet$  delivered
- $\bullet$  documentation
- processing
- source

# 2.3 Team Concept

# 2.3.1 Paired Programming

some point about pp

Part III

Service

# Chapter 3

# Tools

- 3.1 QGIS Tools
- 3.1.1 Using COGO Tools in QGIS

Set up the Azimuth and Distance Plugin (Azd Plugin).

In the Plugins drop down(1), under the topography group select the **Azd Plugin(2)**(see fig.).

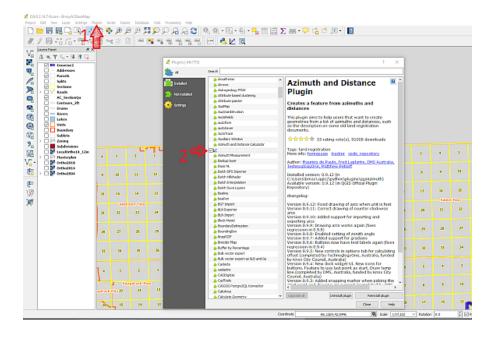

Figure 3.1: launch plugin

Note here which layer is active (see fig.).

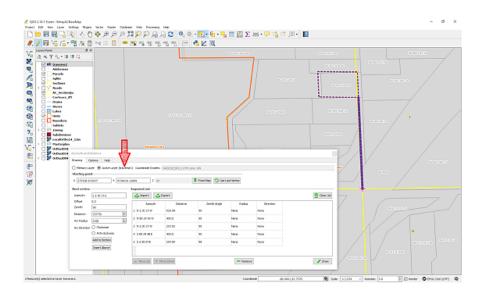

Figure 3.2: check active layer

If necessary, left click the layer  $traverse\ 1$  in Layer Panel to activate it(see fig.).

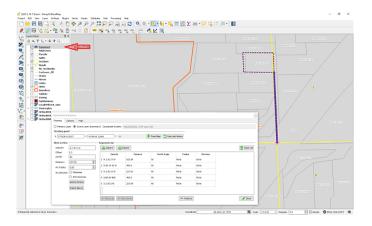

Figure 3.3: activate layer

**Configure Options** On Options Tab: Select Boundary, Bearing, Feet, and Degree radio buttons.

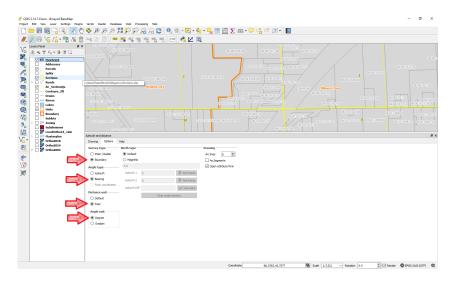

Figure 3.4: Plugin Options

Using the tool Boundary descriptions are entered into the Drawing Tab. Azimuth (bearing) and Distance are the important boxes (Set Offset = 0 and Zenith = 90 and ignore)(see below).

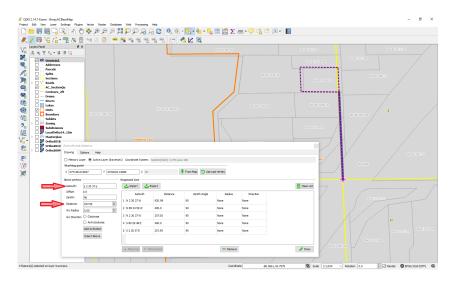

Figure 3.5: Entering Bounds

23

# Configure editing environment

Use Settings Dropdown and Snapping Options to enable snapping to Sections, Quarter Sections, and or Parcels if desired (see fig.).

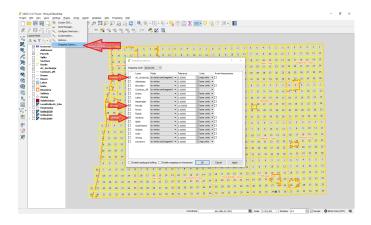

Figure 3.6: Configure editing environment

# **Locate Point of Commencement**

To get to the Point of Commencement,

Use any combination of the following methods:

- Using Reference Layer
- Using Measuring Tool
- Search by Parcel Number (Search Layers Plugin)
- Draw COGO lines (Azd Plugin)(as described earlier)

Using Reference Layer Use reference layers; Units, AC\_SectionsQu, Sections, and Parcels. Toggle layers on and off in Layers Panel and zoom in and out with mouse wheel.

25

Using Measuring Tool Use the measuring tool, make sure to set units to feet. To exit current measurement right click (see fig.).

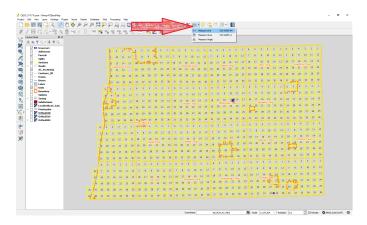

Figure 3.7: Measuring Tool

# ${\bf Search\ by\ Parcel\ Number}\quad ({\rm Search\ Layers\ Plugin.})$

To Launch Search Layers Plugin: In Plugins dropdown: Enable the **Search Layers** Plugin. (see fig.)

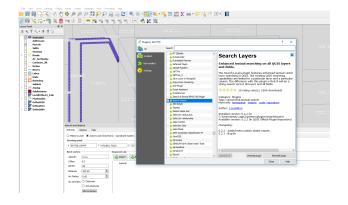

Figure 3.8: Search Layers Plugin

Enter parcel number (with dashes), Set layers, and set search field.(see fig.)

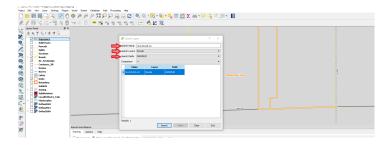

Figure 3.9: Search Layers Setup

# 3.2 LATEX Packages

# 3.2.1 float Package

# **BLAH**

(BLAH).

3.2.2 graphicx Package

# **BLAH**

(BLAH).

3.2.3 hyperref Package

# usepackage

Add the hyperref package to the preamble last.

\usepackage[options]{hyperref}

# Simple Use

Use \href{URL}{DESCRIPTION} to add a link with description
Example:
\href{https://www.latex-tutorial.com}{Website with tutorials}
produces:

Website with tutorials

# Options

Add optional arguments to the usepackage line: Useful options:

# • pdftex

enables other options like breaklines

#### breaklinks

allow links to be broken across several lines eg. https://lists.gnu.org/archive/html/emacs-orgmode/2013-06/msg00776.html

#### • colorlinks

Colors the text of links and anchors.(default is false)

#### linkcolor

Color for normal internal links(default is red).

#### • anchorcolor

Color for anchor text.

citecolor

Color for bibliographic citations in text.

urlcolor

Color for linked URLs

# Use with options

\usepackage[breaklinks,colorlinks,citecolor=blue,urlcolor=green]{hyperref}

## Commands

\href{URL}{text} Makes text a link to URL.

Manual for hyperref

\hyperref[label]{text}

Makes text a link to where

\ref{label} would point.

\hypertarget{name}{text} Sets an anchor on textwith the label name.

\hyperlink{name}{text} Makes text a link that takes you to the anchor labeled name. Pair with \hypertarget.

\phantomsection Used in conjunction with

\addcontentsline to make the correct link in the Table of Contents.

#### 3.2.4 import Package

## BLAH

(BLAH).

## 3.2.5 wrapfig Package

## BLAH

(BLAH).

# 3.3 LaTeX Templates

# 3.3.1 LATEX Section Template

%\documentclass[class=report , crop=false, multi={itemize, figure}, float=false]{standalone}

\input{../../preamble}

```
\def\titlename{Section Template}
\title{\input{....../commonTitle}} % closing brace for title
\begin{document}% Document Begins
\input{....../commonFront} % provides standalone options
\section{SECTION NAME HERE}
\subimport{RELATIVE PATH TO NEW Section/}{NEW SUBSECTION Subsection.tex}
%eg.
%\subimport{latexTemplatesSection/}{subsectionTemplateSubsection.tex}
% etc...
\end{document}
```

# 3.3.2 LaTeX Subsection Template

```
\documentclass[class=book , crop=false]{standalone}
\input{../../preamble}
\def\titlename{Subsection Template}
\title{\input{../../commonTitle}} % closing brace for title
\begin{document}% Document Begins
\input{../../commonFront} % provides standalone options
% NEW INFO GOs HERE.
\subsection{Subsection Template}
\medskip
```
